

# Revolutionize school safety with AI

VOLT AI offers an intelligent security solution designed to protect your students and staff like never before.

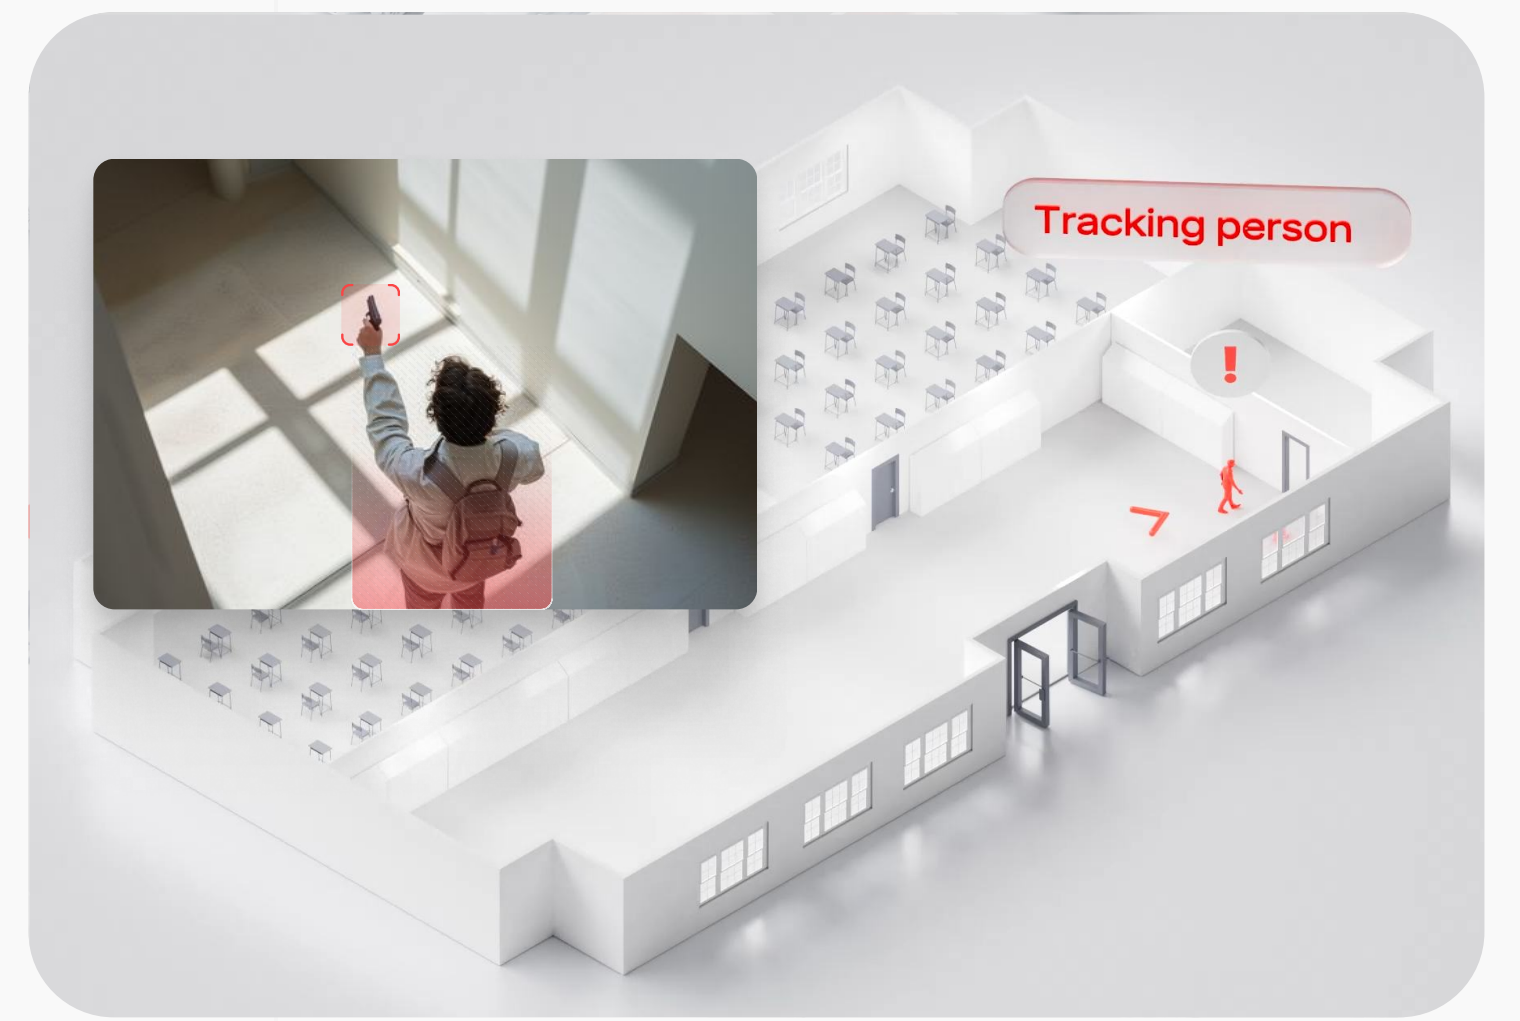

## Instant alerts for fights, bullying, and medical crises

Ensure immediate intervention during altercations or medical emergencies.

## Guard against after-hours intrusions

Stay vigilant even when school is out. Our system proactively alerts you of any unauthorized access or trespassing.

## Continuously track and neutralize active threats

Rapidly pinpoint an active shooter's location, minimizing response time and enhancing protection protocols.

## Key features

### Real-time threat detections

Eliminate the need for constant monitoring. Act on emergencies instantly with automated alerts through SMS, email, or the VOLT Portal.

### Precise and thorough reporting

Save time with instantly generated incident reports including exact location data, video evidence, and incident timeline.

### Custom escalation paths

Tailor alerts to specific incidents, locations, or buildings, ensuring the right people are informed at the right time.

### Complete visibility from anywhere

Manage your building's security seamlessly from any device, with a centralized cloud-based platform offering a panoramic view of all cameras.
